

Our booth number will be reflected in the app and the program as Space #312.

Each space is measured out as 10 feet long, 6 feet deep for a total of 30 feet long. But we have some wiggle room to play with along that wall if we stay within fire code and don't receive complaints from the fire marshal. Just north of the 412 booth across from 510 is an open area. We can slide you over towards that area if needed, or you can encroach into that area and I know nothing 😊 but the table in that area cannot be draped because of the air flow. Might be a great space for a couple of high-top tables. That space is where Pray.Com ended up last year using the long gold high top table that Pangea had rented and decided was not a fit for them so allowed you guys to use it.

Do you want drapes between those spaces? Arata can drape it how you like. I think they normally just place a drape at the beginning of 312, at the end of 412 and behind all three.

Those drape changes/decisions can also be made after your arrival by Arata Expo.

Each space comes with a 6-foot skirted table, 2 chairs, waste basket, and the small white booth sign.

Let me know your thoughts and if you have additional questions.

One more question for you guys, would you like to host one of our authors on Tuesday night of the grand opening. I've got Rob McKenna with Wild Leaders and Scott Rodin with The FOCUS Group participating in the book signing but do not have space within the hall. Maybe a great way to enhance or increase your foot traffic.

The wiggle room is in the length. See purple box. I will reach out with the hotel on ceiling heights again.

If memory serves me, it gets wacky back there as it was once upon a time a parking garage.

No columns, just doors/exits on one side of your space and the air intake area on the other side.

This enlarged screen shot might help
